03/27/09 14:00 CST 0 Winter Storm 0

03/28/09 17:00 CST

A winter storm brought a variety of winter weather to extreme southeast Kansas into west central Missouri from the afternoon of January 27th into January 28th. A mix of freezing drizzle, freezing rain and sleet transitioned to a period of snow. Ice accretion up to one quarter of an inch coupled with sleet and snow accumulations of two to five inches resulted in treacherous travel conditions.

Thunderstorm wind gusts downed a few trees.

Damaging winds and large hail were observed over portions of the Missouri Ozarks during the morning hours of 8 March. A roof on an elementary school in Fair Grove was completely destroyed. Meanwhile, another roof of a business in Climax Springs was also destroyed from the straight line winds. Other roof and tree damage occurred in several other locations across the Ozarks.

A winter storm brought a variety of winter weather to extreme southeast Kansas into west central Missouri from the afternoon of January 27th into January 28th. A mix of freezing drizzle, freezing rain and sleet transitioned to a period of snow. Ice accretion up to one quarter of an inch coupled with sleet and snow accumulations of two to five inches resulted in treacherous travel conditions.
